### PROFILE

I'm Chips, a front-end web developer and UI/UX designer passionate about creating beautiful, functional, and user-centered digital experiences. With 2 years of experience in the field. I am always looking for new and innovative ways to bring my client's visions to life. I believe that design is about more than just making things look pretty – it's about solving problems and creating intuitive, enjoyable experiences for users. Whether working on a website, mobile app, or other digital product, I bring my commitment to design excellence and user-centered thinking to every project I work on. I look forward to the opportunity to bring my skills and passion to your next project.

### WORK EXPERIENCE

#### Front-end Developer

2023

##### SpotiTubeMerge

- Worked on the project as a front-end developer.
- Assisted in building 100% reusable code and library for future use.
- Participated in product release and code review with the senior developer.
- Optimized the application for maximum speed and scalability.

#### Front-end Developer

2023

##### Genesis-Dashboard

- Designed login and main page of the website as well as optimized it for maximum speed.
- Performed code reviews and bug fixes.
- Analyzed the impact and effectiveness of in-app UI changes on customer retention; identified features of customer behavior and recommended additional menu modifications.
- Worked alongside 2 developers to implement APIs which helped the internal analytics team to increase the reporting speed.
- Learned about APIs and their whereabouts.
